## **Motilal Oswal Report**

Escorts Kubota Ltd. hosted the investing community, followed by the plant visit at its Faridabad facility, where the entire senior management presented their mid-term strategy (till FY28E) and focus areas.

Escorts Kubota is now focusing on leveraging strong synergy benefits for a comprehensive growth across business areas. The company's focus would revolve around-

1. growing market share in India (through new product launches and channel expansion),
2. attaining leadership position in exports (through product developments),
3. continuing with the ramp-up of other businesses, and
4. improving profitability.
